# COPPER SUPPLY & CONSUMPTION 2001 — 2022

## Preface

Statistical data on the supply and consumption of copper and copper alloys in the United States are available from many governmental and private sources. In this report, original data from these sources are brought together and rationalized by CDA and Global Market Consultants, Inc. (GMC) to provide a set of data on U.S. copper supply and consumption that is both consistent and accurate in all aspects from mine to end-use market.

The main sources of information assembled here include, the U.S. Department of the Interior's, U.S. Geological Survey, National Minerals Information Center; the U.S. Department of Commerce's, Bureau of the Census; the U.S. International Trade Administration and Copper Development Association Inc. Where data from different sources are conflicting, and where original data appear to be in error, the best judgment has been applied. General sources are shown in the tables throughout the report. Those interested to know the specific sources of any of the data should contact CDA.

The statistics are arranged in a logical sequence to trace the flow of copper in the U.S. economy from mining and scrap collection through smelting, refining and ingot making to wire rod mills to wire mills, brass mills, and foundries to the final end-use markets. This flow is shown schematically on pages 4 and 5. On this schematic flow sheet the major statistics of copper supply and consumption in the United States for 2022 appear. Along with each major statistic on the chart, a reference is shown. This reference identifies the table in the report where details on that item, from 2002 through 2022, will be found. Most data for 2022 are preliminary.

There are four major tables in the report. Table 1 covers the supply of primary copper. Table 2 presents data on the supply of copper from secondary sources. In Table 3, statistics on the consumption of primary and secondary metals by mills, foundries and other industries are summarized. These three tables are provided by Global Market Consultants, Inc.

Finally, Table 4 details the supply of mill, foundry and powder products and their consumption in five end-use market areas. In each of these tables, additions to the flow (such as net imports) are indicated as positive numbers, while subtractions from the flow (such as melting losses or net additions to stocks) are shown in parentheses.

The arrangement of the data in the report can be illustrated with an example. Consider Mine Production, the upper left-hand box in the flow sheet on page 4. As shown in the box, mine production of copper in the United States totaled 1,359 thousand short tons in 2022. Beneath this figure a number appears referring to Table 1, abbreviated 1 (1). This means that in Table 1, on Line (1), mine production is shown for the full period 2002 through 2022. In Table 1, on Line (1), a further reference will be found after the item heading Mine Production, directing the reader elsewhere on page 6. In fact, on page 6, a table entitled Table 1, Item 1 presents the data on mine production by state for 2002 through 2022. In this way all the data on supply and consumption appear in logical sequence proceeding through the report, eliminating the need for explanatory text.

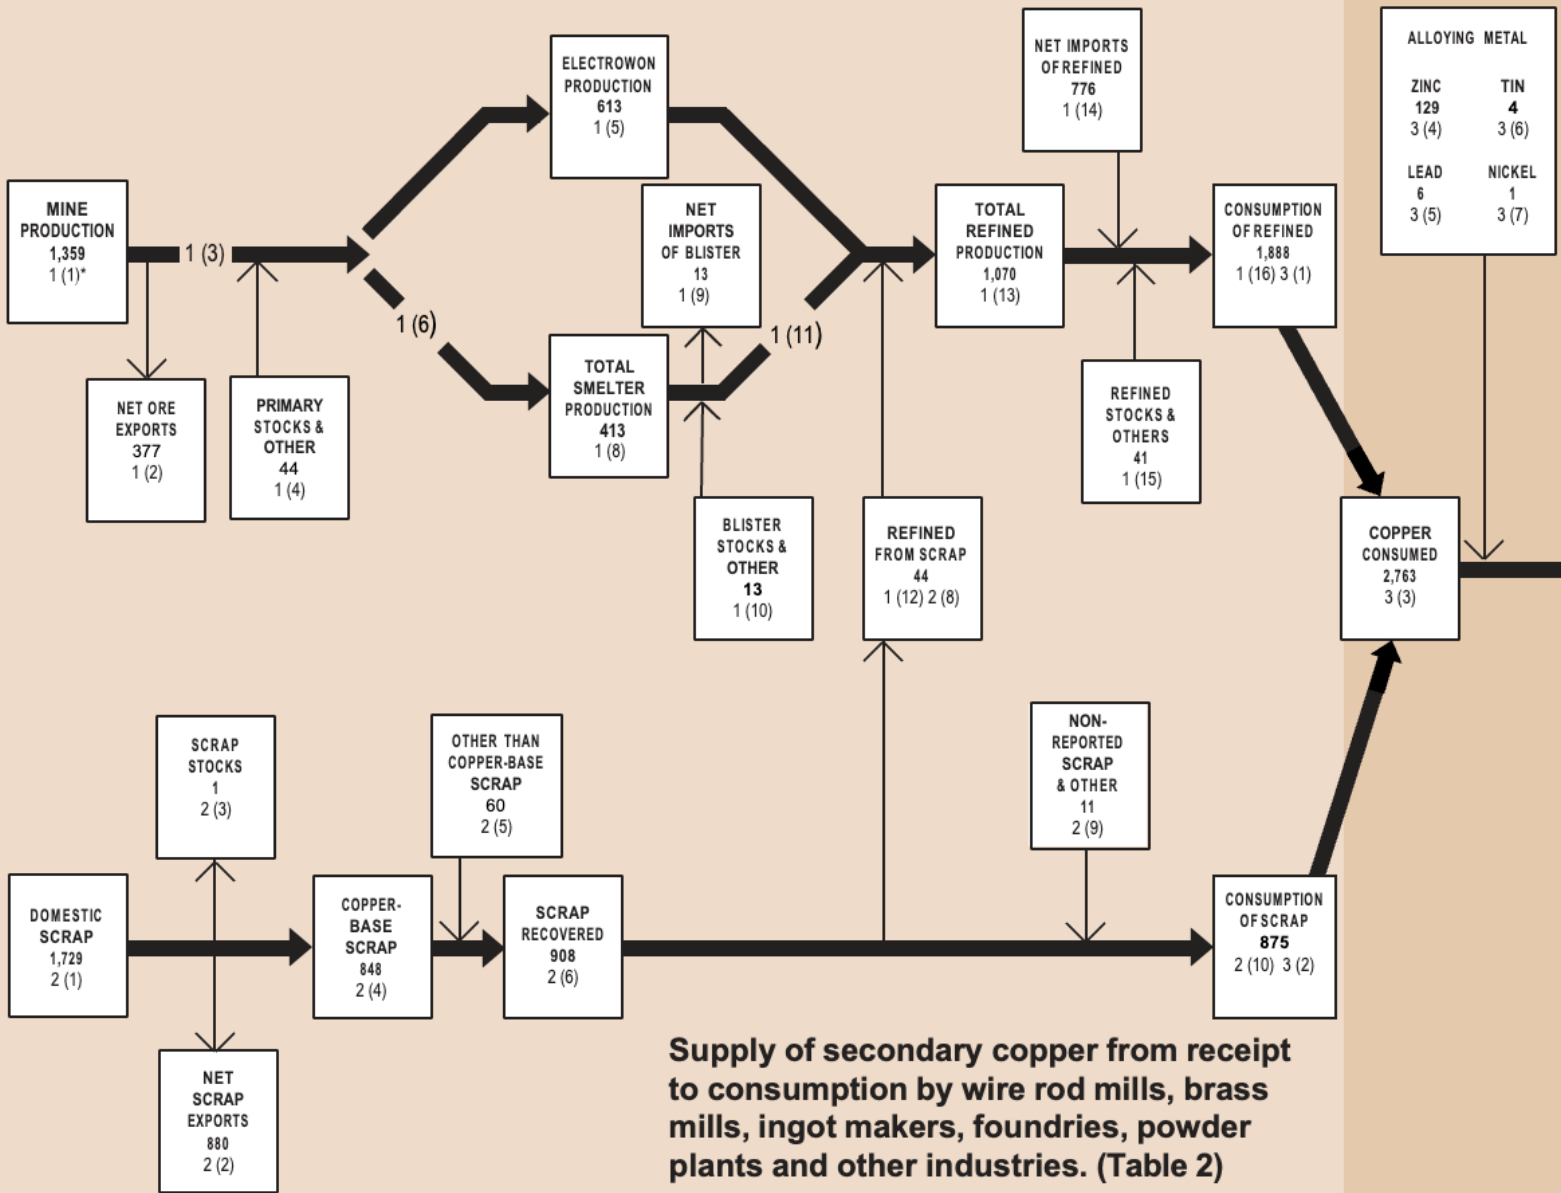

## Contents

<b>Preface</b> .....	<b>2</b>
<b>Copper Supply and Consumption—A Schematic Flow Chart</b> .....	<b>4</b>
<b>Table 1 Supply of Primary Copper</b> .....	<b>6</b>
Item 1 Copper Content of Mine Production—USA .....	6
Item 1a Copper Content of World Mine Production .....	7
Item 2 Imports and Exports of Copper Ore, Concentrates and Matte .....	8
Item 8 Smelter Production of Copper .....	8
Item 9 Imports and Exports of Blister and Anode Copper .....	8
Item 10 Blister and Anode Stocks and Other .....	9
Item 13 Production of Refined Copper .....	9
Item 14 Imports and Exports of Refined Copper .....	9
Item 15 Refined Stocks and Other .....	10
Item 16 Consumption of Refined Copper .....	10
<b>Table 2 Supply of Secondary Copper</b> .....	<b>11</b>
Item 2 Imports and Exports of Copper-Base Scrap .....	12
Item 3 Copper-Base Scrap Stocks.....	12
Item 6 Recovery of Copper from Scrap .....	13
Item 10 Consumption of Copper Scrap .....	13
<b>Table 3 Consumption of Metals by Wire Rod Mills, Brass Mills, Ingot Makers and Foundries</b> .....	<b>14</b>
Item 3 Consumption of Copper by Wire Rod Mills, Brass Mills, Ingot Makers and Foundries .....	15
Item 8 Consumption of Alloying Metal by Brass Mills, Foundries and Others.....	16
Item 12 Net Consumption of Metals by Wire Rod Mills, Brass Mills, Foundries and Others .....	17
<b>Table 4 Supply and Consumption of Wire Mill, Brass Mill, Foundry and Powder Products</b> .....	<b>18</b>
Item 16 Supply of Brass Mill Products—USA .....	19
Item 16a Supply of Brass Mill Products—in Selected Countries .....	19
Item 20 Imports and exports of Wire Mill, Brass Mill and Powder Products .....	20

**Supply of primary copper from mine to consumption by wire rod mills, brass mills, ingot makers, foundries, powder plants and other industries. (Table 1)**

COPPER CONTENT, thousands of short tons

**Supply of secondary copper from receipt to consumption by wire rod mills, brass mills, ingot makers, foundries, powder plants and other industries. (Table 2)**

COPPER CONTENT, thousands of short tons

\*1 (1) Refers to table and item in report where data for 2002 through 2022 appear.

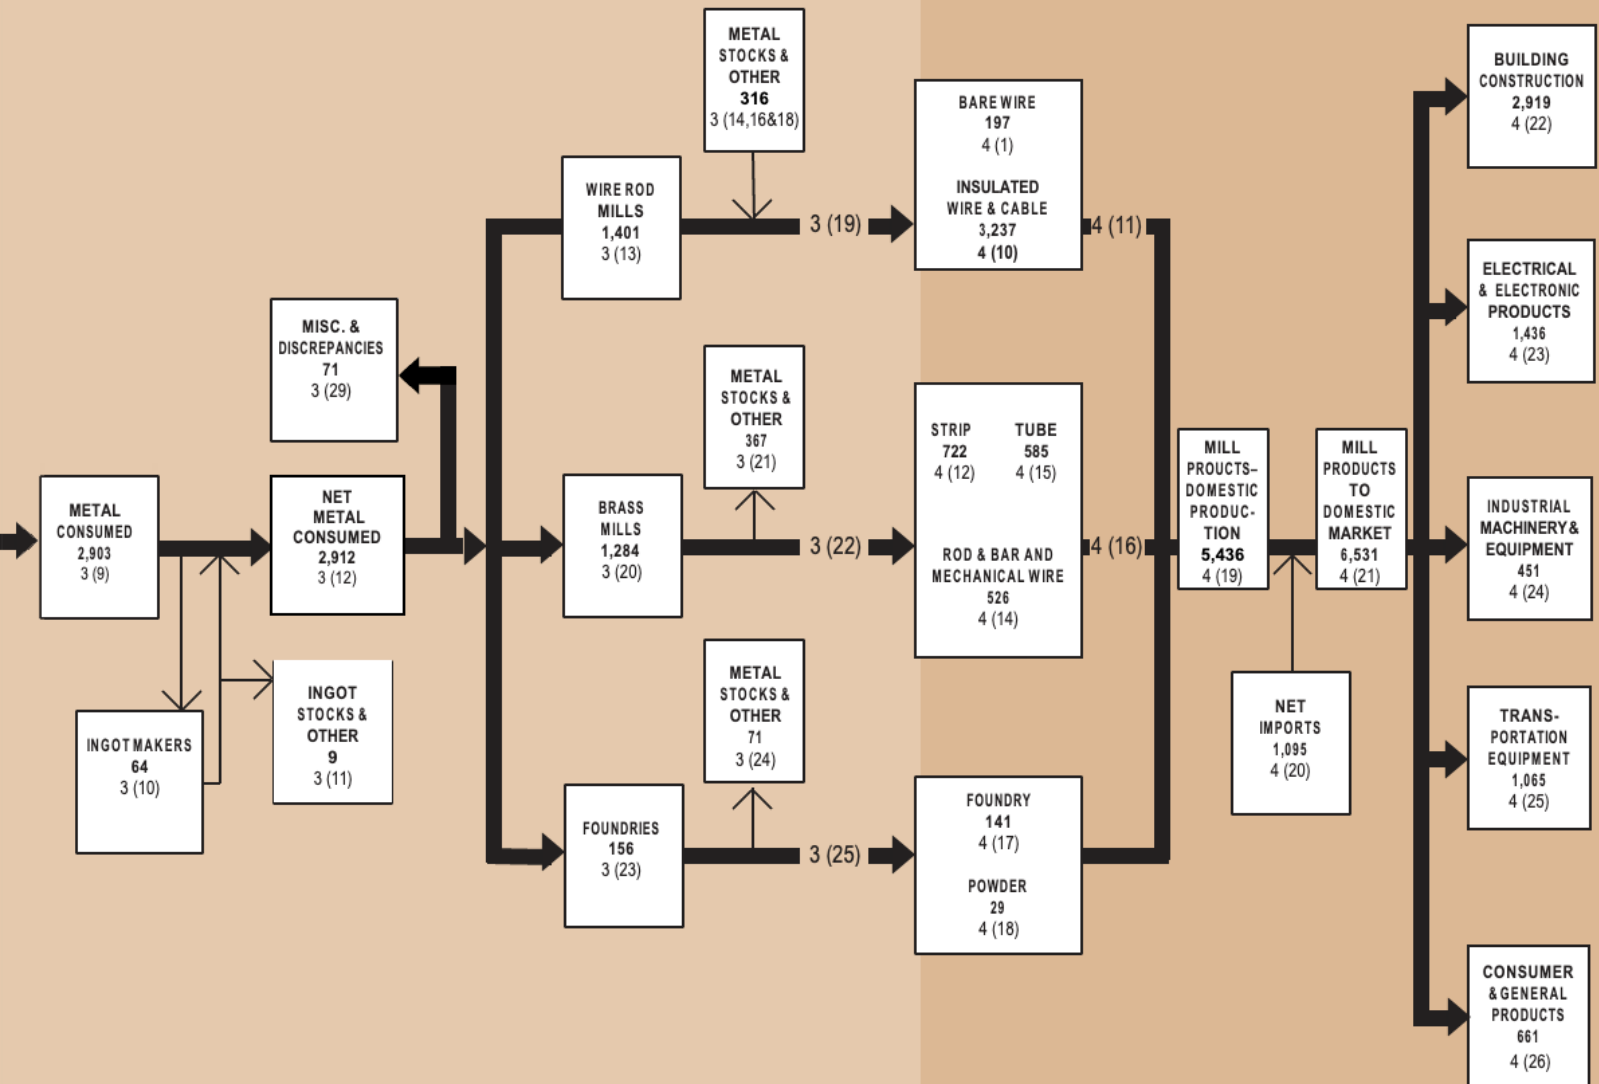

Note: Numbers may not sum due to rounding.

**Consumption of metals by wire rod mills, brass mills, ingot makers, foundries, powder plants and other industries. (Table 3)**

METAL CONTENT, thousands of short tons

**Supply of wire mill, brass mill, foundry and powder products and their consumption in the end-use markets. (Table 4)**

METAL CONTENT, millions of pounds

**Table 1.**  
Supply of primary copper from mine to consumption by wire rod mills, brass mills, ingot makers, foundries, powder plants and other industries

p - preliminary r - revised

(1) Copper content of concentrates, precipitates, or electrowon.

(2) Included in "Other" starting in 1995.

(3) Kazakhstan reported separately from the Russian Federation starting in 1992; included with Russian Federation for 1986-1991.

(4) Laos no longer included with Other starting in 2013.

(5) Mongolia no longer included with China starting in 2007.

(6) Includes countries from various continents, making the continent totals somewhat low.

Numbers may not sum due to rounding.

p - preliminary, r - revised

(a) - Direct consumption only; not including consumption of copper in ingots from ingot makers.

(b) - Ingot makers consume refined copper, scrap copper and alloying metal and ship to foundries, brass mills, powder plants and other industries.

(c) - Starting with 1995 Powder Plants and Other Industries data are included with "Foundries and Other Industries."

(d) - Miscellaneous - reconciles discrepancies between USGS reports.

Numbers may not sum due to rounding.

p - preliminary, r - revised

(a) - Starting with 1995 Powder Plants and Other Industries data are included with "Foundries."

(b) - Total consumption of ingot shown here is less than the consumption of metal by ingot makers shown in the details of Table 3, Item 3, and Table 3, Item 8. The difference, shown as Ingot Stocks & Other in Table 3, is partially melting and other losses in the making of ingot. Numbers may not sum due to rounding.

Note: Numbers may not sum due to rounding.

p - preliminary, r - revised

(a) - Copper content.

(b) - Rod and bar and mechanical wire data combined starting 2008.

(c) - Commercial tube and plumbing tube data combined.

(d) - Powder product shipments reference only structural metallurgy products and DO NOT include powder used for plating, pigments, chemicals and other miscellaneous uses.

\* Markets include:

**Building Construction** - Building Wire; Plumbing & Heating; Air Conditioning & Commercial Refrigeration; Builders Hardware; Architectural

**Electrical and Electronic Products** - Power Utilities; Telecommunications; Business Electronics; Lighting & Wiring Devices

**Industrial Machinery and Equipment** - In-Plant Equipment; Industrial Valves & Fittings; Non-Electrical Instruments; Off-Highway Vehicles; Heat Exchangers

**Transportation Equipment** - Automobile; Truck & Bus; Railroad; Marine; Aircraft & Aerospace

**Consumer and General Products** - Appliances; Cord Sets; Military & Commercial Ordnance; Consumer Electronics; Fasteners & Closures; Coinage; Utensils & Cultery; Miscellaneous

**Table 4, Item 16.**

Sources: U.S. International Trade Administration

p - preliminary, r - revised

(1) - In previous additions, wire rod exports were included in the table. Starting with 1999, net wire rod imports are shown as line 16 on table 3, page 14. Appropriate adjustments have been made for all years.

Note: Changes to the trade dataset are made from time to time as the USITC adds, collapses, or sometimes stops collecting data for certain Harmonized Tariff codes.

Numbers may not sum due to rounding.
